RADSpa Component Installation Guide

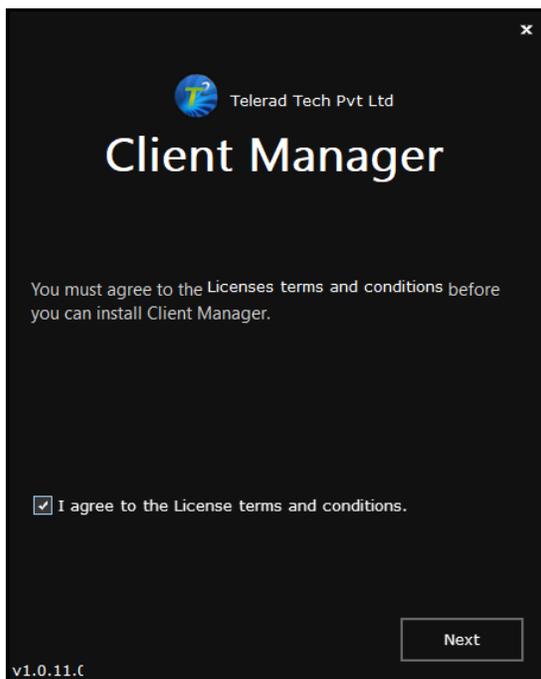

■ For systems with Windows OS:

➤ RADSpa Viewer Installation Guide

- Step 1: Download the **Client Manager** installer file from the RADSpa login page (Available under “**Click here**” section)
- Step 2: Client Manager installer file download gets started in the local system

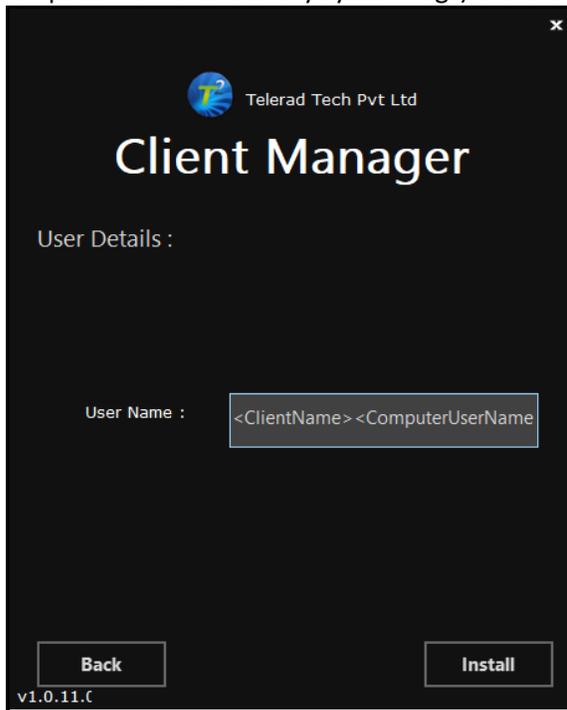

- Step 3: Click on the downloaded link to execute the installation process
- Step 4: Client Manager Window will pop-up

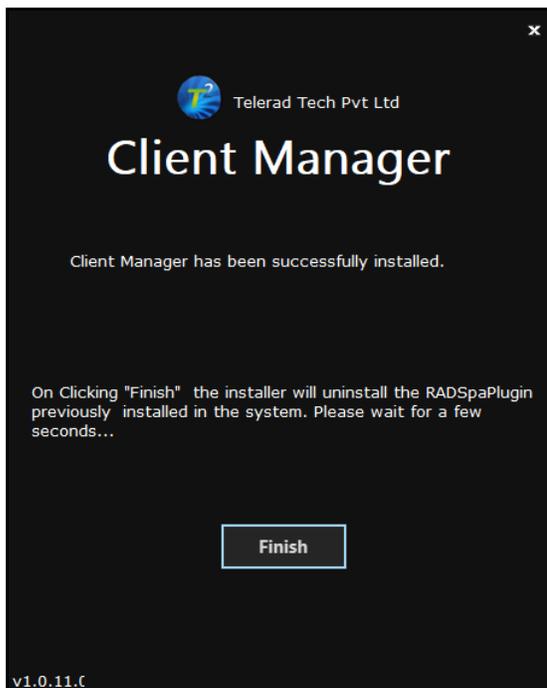

- Step 5: Accept licensing terms and conditions and Click on **Next** to proceed with installation

- Step 6: Provide User name (not RADSpa application user name. Provide an unique name or Computer name to identify system logs) and click on **Install**

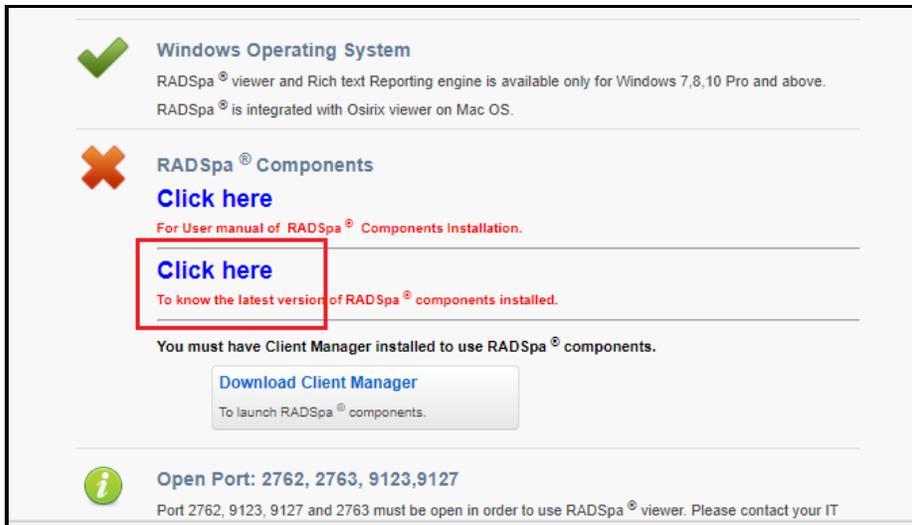

Installation process will begin

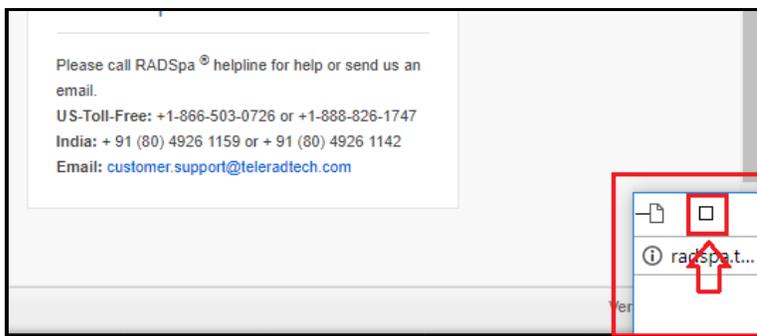

- Step 7: Once the installation is done Click on **Finish**

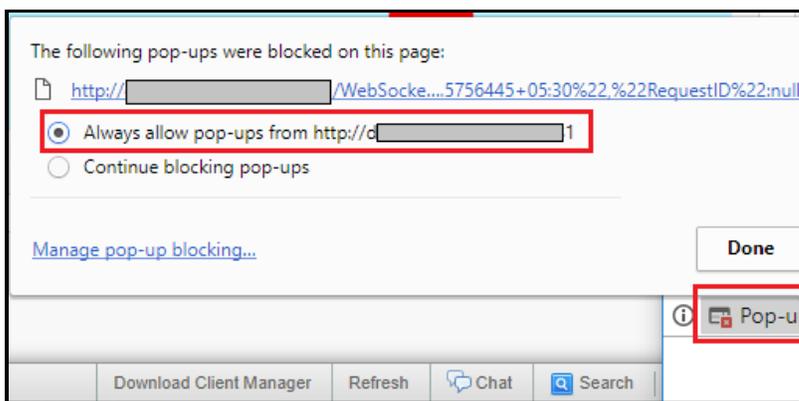

- Step 8: On Login page, Click on second “**Click here**” button (as shown in below screen), to allow execution of Client manager application installed in the system

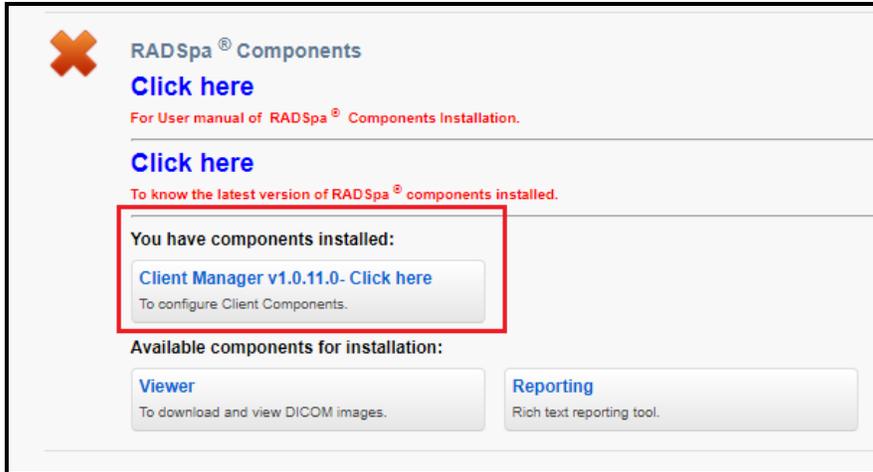

A pop-up window will appear at bottom right corner, select and maximize the window to **allow** pop-up as shown below,

Select **“Always allow pop-ups”** option

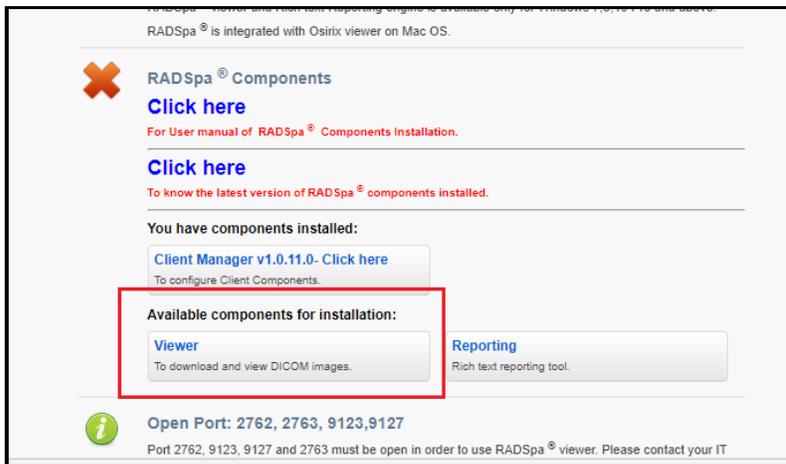

- Step 9: On login page, click on second **“Click here”** button to refresh the page. The component installed in the system will be displayed

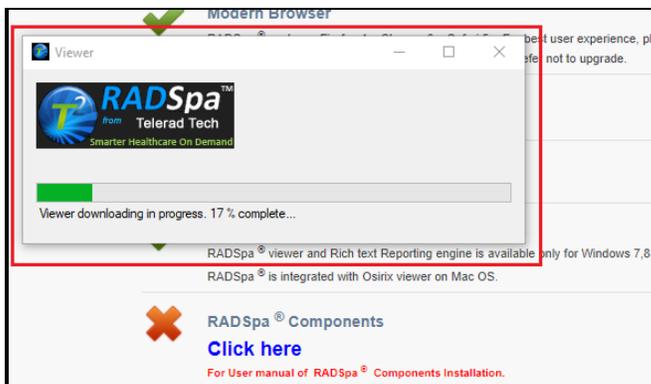

➤ RADSpa Viewer Installation Guide (Only for Windows OS Systems)

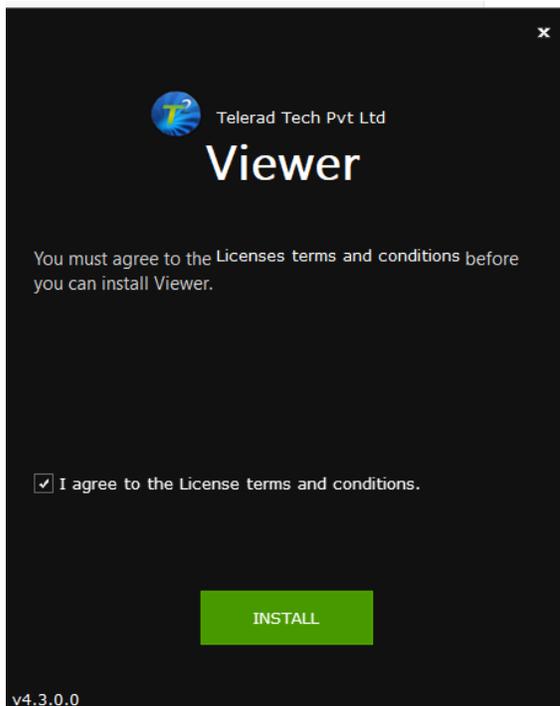

- Step 1: On Login page, click on the “Viewer” button to download and install the 2D Viewer application in the system

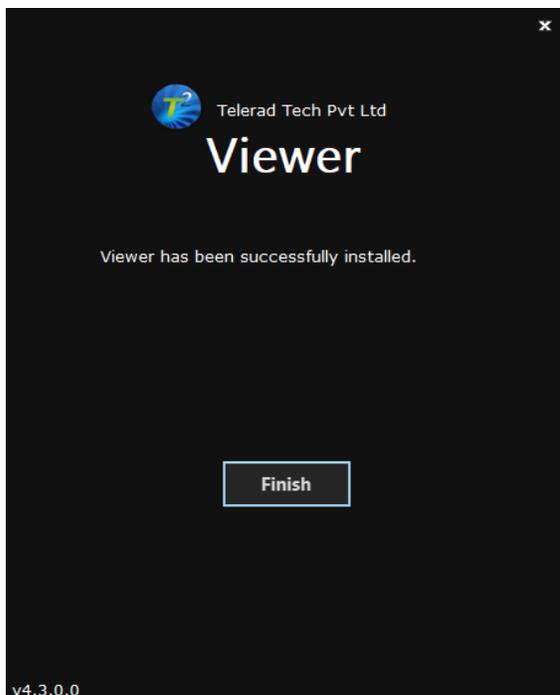

- Step 2 : Viewer installer file download gets started in the local system

- Step 3: Viewer installation Window will pop-up

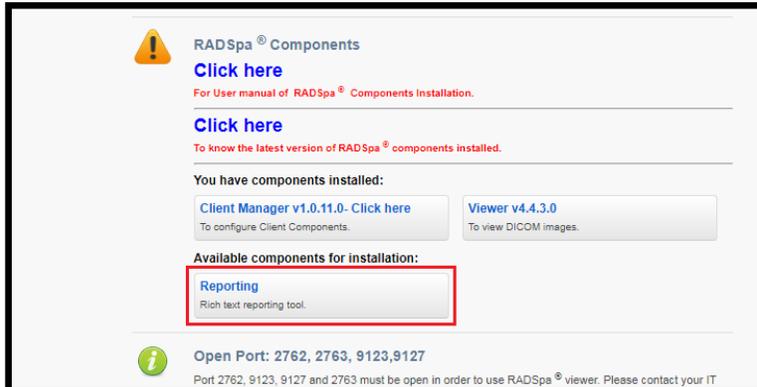

- Step 4: Accept licensing terms and conditions and Click on **INSTALL** to proceed with installation
Installation process will begin
- Step5: Once the installation is done Click on **Finish**. The Viewer installer process is completed.

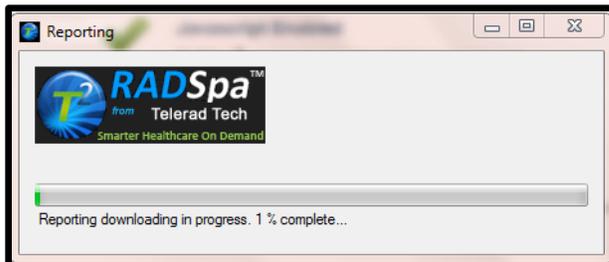

➤ RADSpa Reporting Installation Guide (Only for Windows OS Systems)

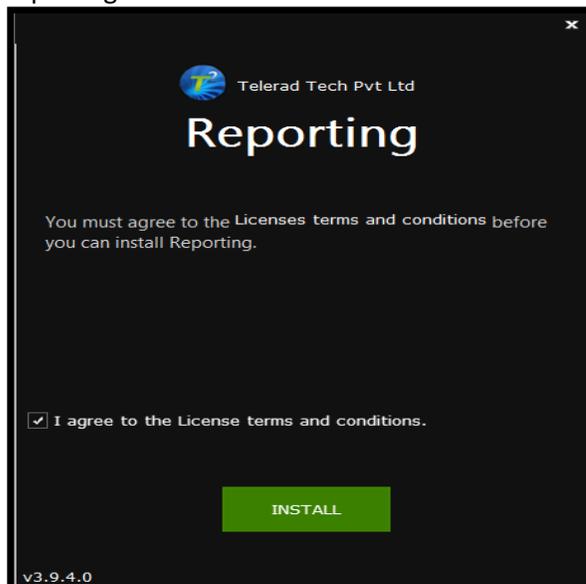

- Step 1: On login page, click on the “Reporting” button to download and install reporting application in the system

- Step 2: Installer will download the reporting application in the local system

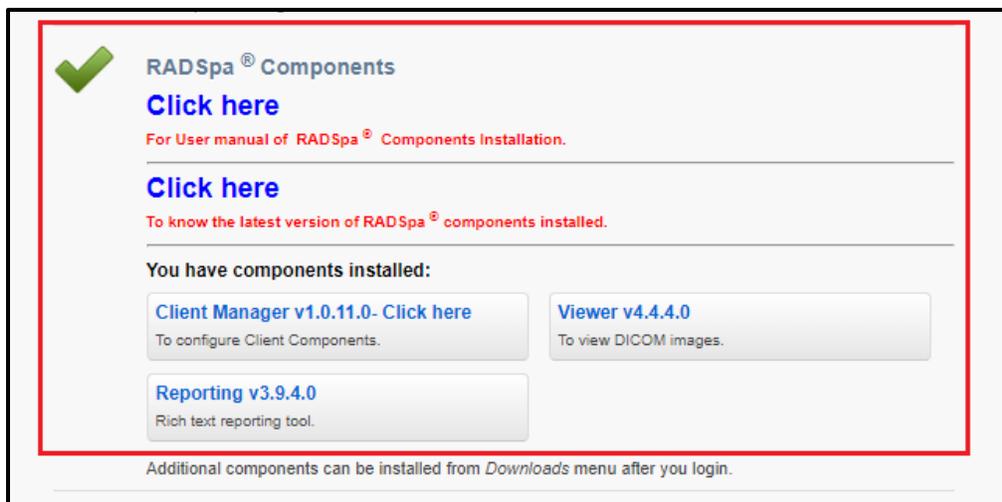

- Step 3: Once the reporting installer download completes, open the installer file, a pop-up window will appear and click on **License terms and Conditions** check box and click on “INSTALL” to install reporting tool

- Step 4: Once the installation is done, click on **Finish** to finish the installation

On login page, click on second “**Click Here**” button to refresh the page. All the component installed in the system will be displayed with a green tick mark for the component installed section

■ For systems with MAC OS:

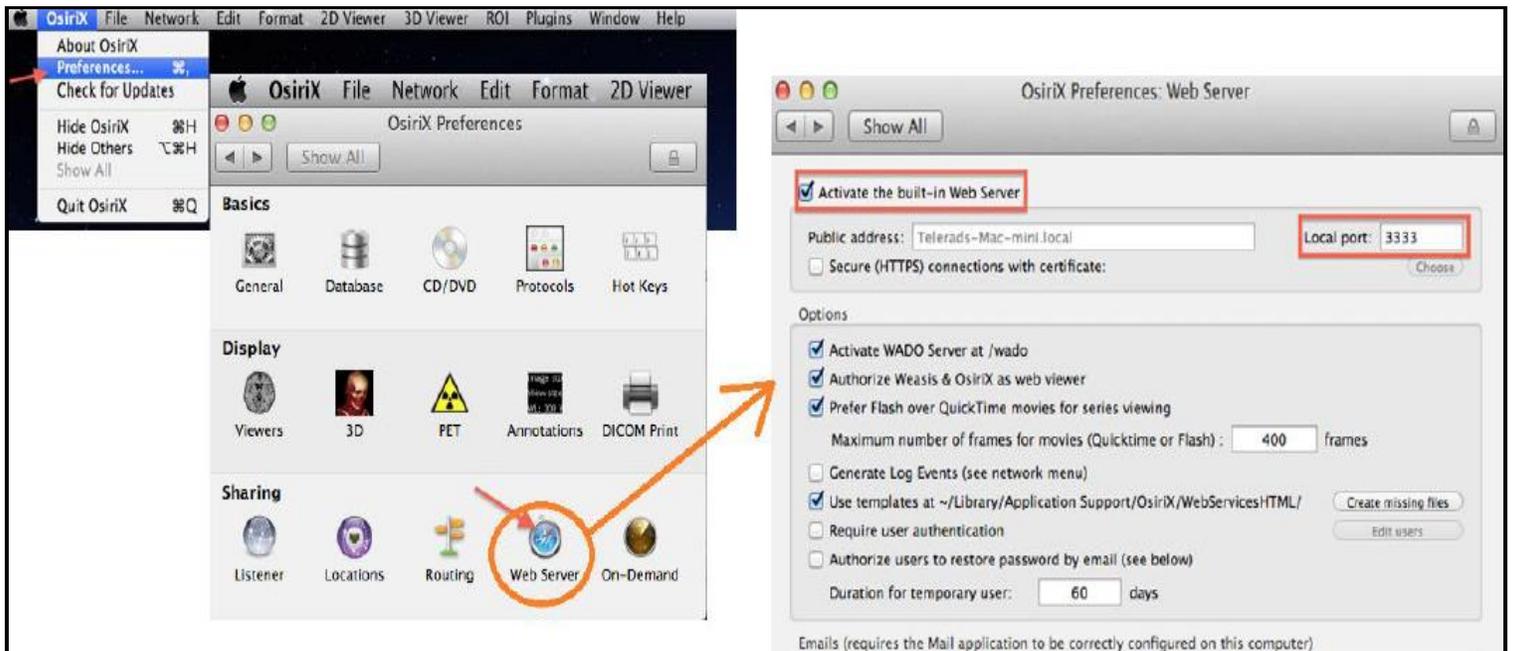

➤ RADSpa Download Manager Installation Guide - (with Osirix/Horos integration)

Prerequisites: Licensed version of [Osirix MD](#) viewer or Open source version of [Horos](#) viewer should be installed in the MAC system by the user. (Osirix MD version is recommended. Osirix Lite version is not recommended by Telerad Tech). Telerad Tech doesn't provide client component for viewer application for MAC system. For Reporting, web reporting will be by default enabled for MAC users.

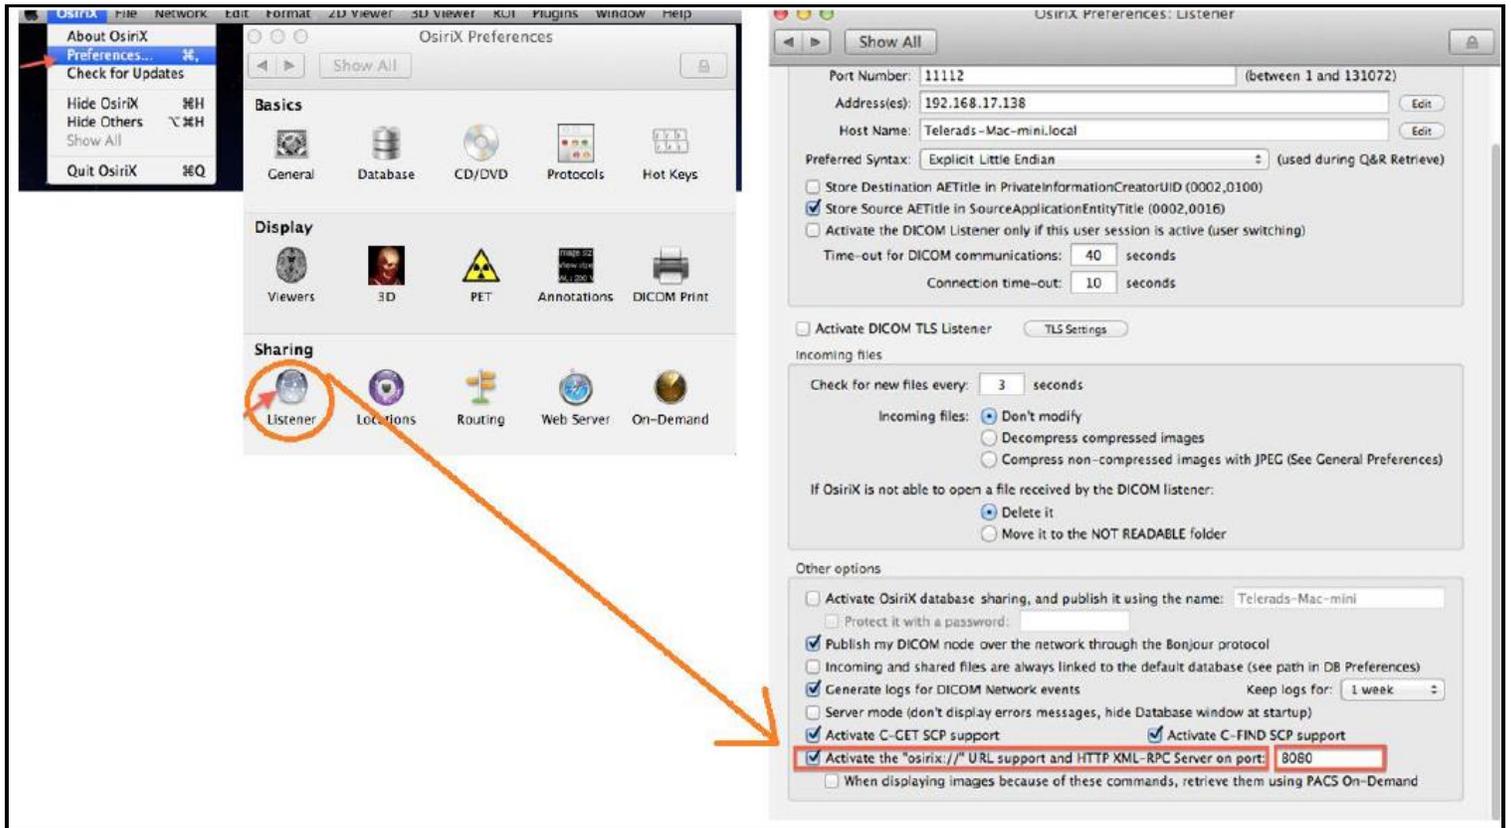

Step 1: Download the **RADSpa® Download Manager** installer file from the RADSpa login page (Available under "RADSpa® Components" section)

Step2: Install the **RADSpa® Download Manager** package in the Mac system

Step3: Open **Osirix** and select **Preferences** → **Web server** and under **Options** section, select "Activate the built-in Web Server" and set Local port as "3333"

Step4: Select **Osirix** → **Preferences** → **Listener** and under **Other options** section, select “**Activate the “osirix://” URL support and HTTP XML-RPC Server on port:**” and set port as “**8080**”

Note: If Osirix/Horos requests for restart, then user should restart the application

Images storage location path in MAC local/user system:

Goto **Home** → **Library** → **Application Support** → **com.yourcompany.RADSpa_Download_Manager** → Folder name containing **AETitle** → **Study UID**
